- Medical Facilities
- Banking Network
- Insurance Data Centers
- Transit Management
- Industrial Operation
- Intelligence Communications

OVERVIEW

The BlackBox KVM Remote Control improves and innovates the standard Secure KVM user experience. When paired with a BlackBox Secure KVM, the KVM Remote Control provides channel selection options for 2- and 4-port KVMs. For organizations that maximize efficiency and minimize clutter, BlackBox has the correct solution. Combined with the mounting options available for all BlackBox Secure KVM units, our new KVM Remote Control allows full functionality of the KVM while neatly away from vision, offering an optimally decluttered workspace.
